

B. 2. Opinions of students

Florida Misini,
pupil of grade V
in the elementary
school
"N. Berati"
in Dragash

"...These methods are very interesting for me. The lesson is understandable for me and for my friends..."

Bujare Ahmeti,
pupil of grade V
in the elementary
school
"N. Berati"
in Dragash

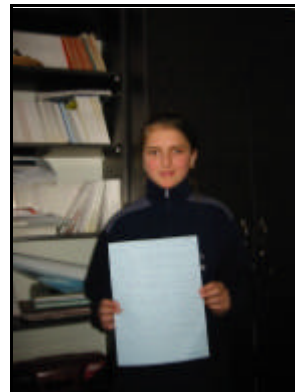

"...The new methods are very useful for understanding the lesson. Most of the teachers use these methods..."

Aida Hamza,
pupil of grade VIII
in the elementary
school
"N. Berati" in
Dragashi

"...In every class we work in groups... and answer together. When the student answers the teacher makes sure that everyone has got it, and then we work in groups. In groups we work better because we remember more and help those who need it..."

Amanda Selmani,
pupil of grade VI
in the elementary
school
"N. Berati"
in Dragash

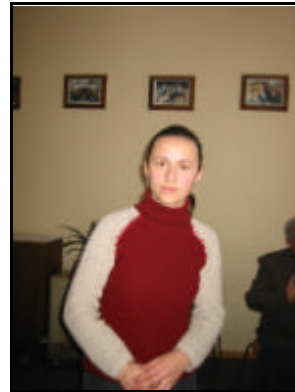

"...I think it is better this way. We work together and everything functions well. My friends help me when I do not understand something, but I also help them. Some students who were not very good before are better now...
I have not seen this method of teaching when I started school. "

Dafina Gllgjani,
pupil of grade VII
in the elementary
school
"V.P. Shkodrani" in
Peja

"...all pupils are equal and they cooperate with each other. They may express freely their thoughts. These methods help even the worst students.... The teacher welcomes all ideas of the students.

We are happy that these methods are applied in our school,.... all students are satisfied with them."

Furtuna Berisha,
pupil of grade VII
in the elementary
school
"V.P. Shkodrani"
in Peja

"... The class is more attractive, the pupils are more interested... They express themselves freely, the teacher respects everyone's opinion.

We have started to articulate our thoughts. This is a great idea and it functions well. The relations with teachers are very good. Teachers used to talk more before and to listen very little, while now it is the other way round..."

Florentina Kaliqani,
pupil of grade VIII
in the elementary
school
"V.P. Shkodrani"
in Peja

"...I am happy that we work together in groups and I want this to go on... We cooperate in groups, everyone expresses their opinion and one is chosen for the leader of the group..."

I have a good impression about this new methodology and I think it should continue."

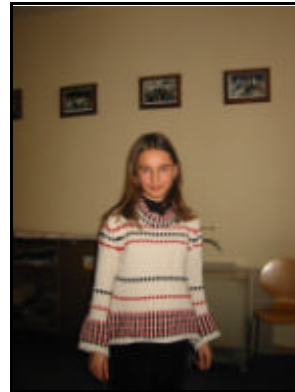

Jeta Pajaziti,
pupil of grade VIII
in the elementary
school
"V.P. Shkodrani"
in Peja

"...Everything is different now. Unlike before, we learn in groups now, we take tests, and we express our opinions freely..."

Fisnik Ukaj,
pupil of grade VIII
in the elementary
school
"V.P.Shkodrani"
in Peja

"I am very happy with the new methods that have been applied... Every student now is free to express his or her thoughts without considering if it is right or wrong. Since these reforms have started, the students are very active."

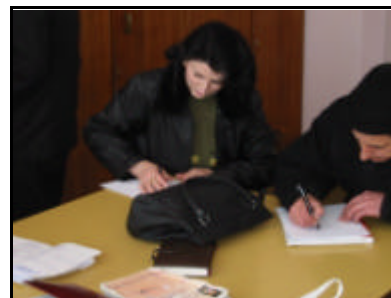

Ilire Gjuka,
pupil of grade VII
in the elementary
school
"V.P. Shkodrani"
in Peja

"The application of new methods is a step towards educational progress in our culture... There are many differences compared with the old way of learning. The classes are more liberal and we express freely our opinions..."

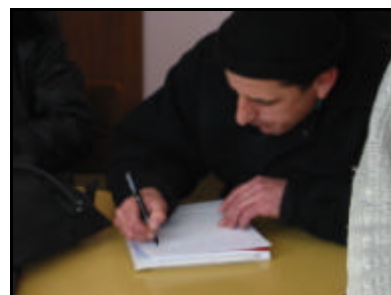

B. 3. Opinions of parents

Indire Rifaj,
parent

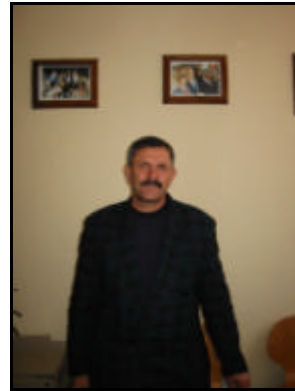

"...I have noticed a change in my children, who understand more easily and also are more happy to work in groups, I have noticed a stronger will. I am satisfied and I support the further development of this method."

Maliq Ahmeti,
parent

"...As the parent of two children, I have noticed that the new methodology of teaching has caused more stimulation in my children... They are now more interested in learning and working with more devotion therefore I want these techniques to continue."

Softiq Hajrij,
parent

"...I may say that I am satisfied with the new methods of learning which are used in the school. My child is very happy when he goes at school. I am thankful for my child and I want to express my gratitude for the new way of teaching."

Qazim Lutvija,
parent

"...My daughter has changed in many aspects, since the new methods have been applied: she is more interested in studies, she is more active at home, she shows more energy than before and makes many logical questions and right conclusions.... she has made a lot of progress.

I think that the new methods at school contribute in the development and overall education of the student."
